

MHACKS 2026 • FINTECH

shamepool

Skip the task. Lose the cash.

Behavioral finance with friends

AI that does real work

Live demo

shamepool.vercel.app

THE PROBLEM

Resolutions fail because breaking them is free.

No cost to quit

Skipping the gym, the library or the run costs you nothing.

Nobody is watching

Willpower alone is private, so excuses are easy.

No proof you showed up

"I went" is a claim, not a fact.

THE SOLUTION

Make flaking cost something, in front of your friends.

1. Commit

Pick a goal, place, deadline and penalty. An AI coach plans it for you.

2. Prove it

GPS radius, a minimum stay and a photo checked by AI vision.

3. Flake, pay

Charged automatically, doubled each time, into the squad pool.

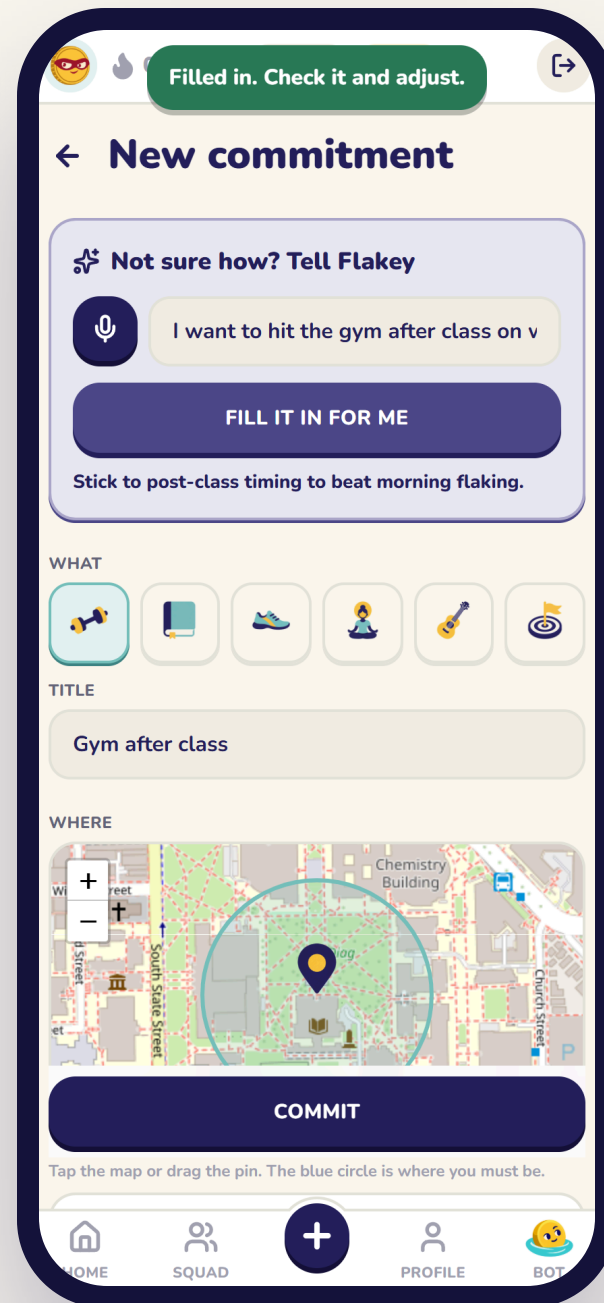

4. Spend or give

The squad votes to spend it together, or it goes to charity.

Nobody wins anyone else's money. That is why it is not gambling.

THE PRODUCT, FOR REAL

Every screen here is the live app.

AI goal coach

One sentence becomes a plan

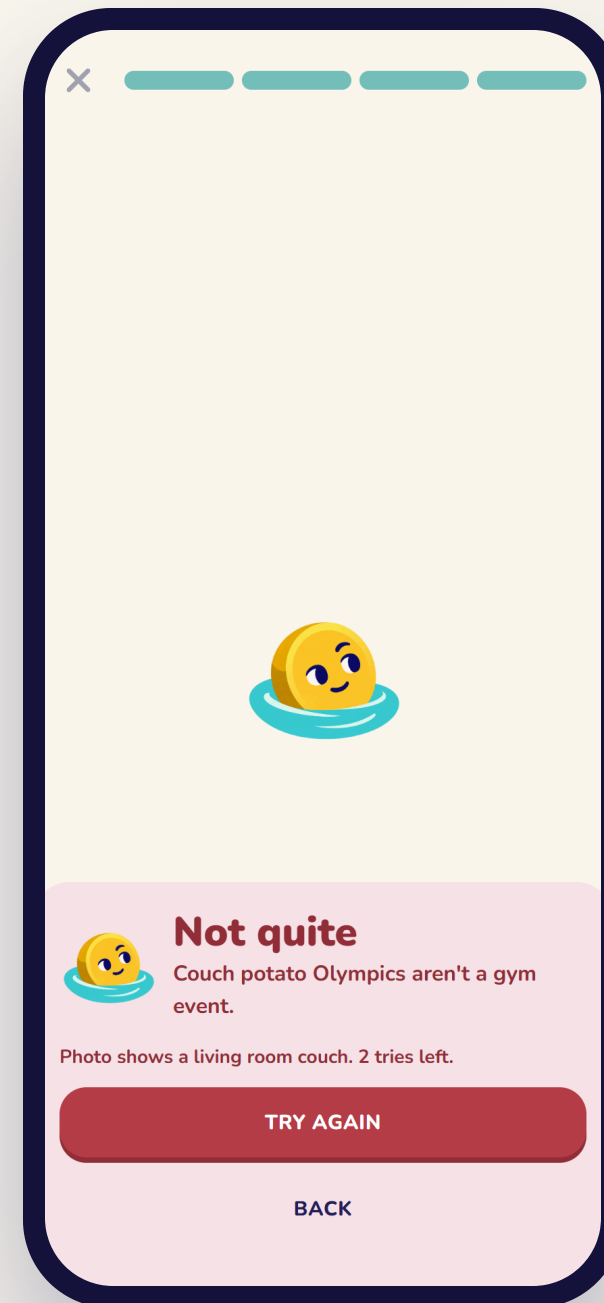

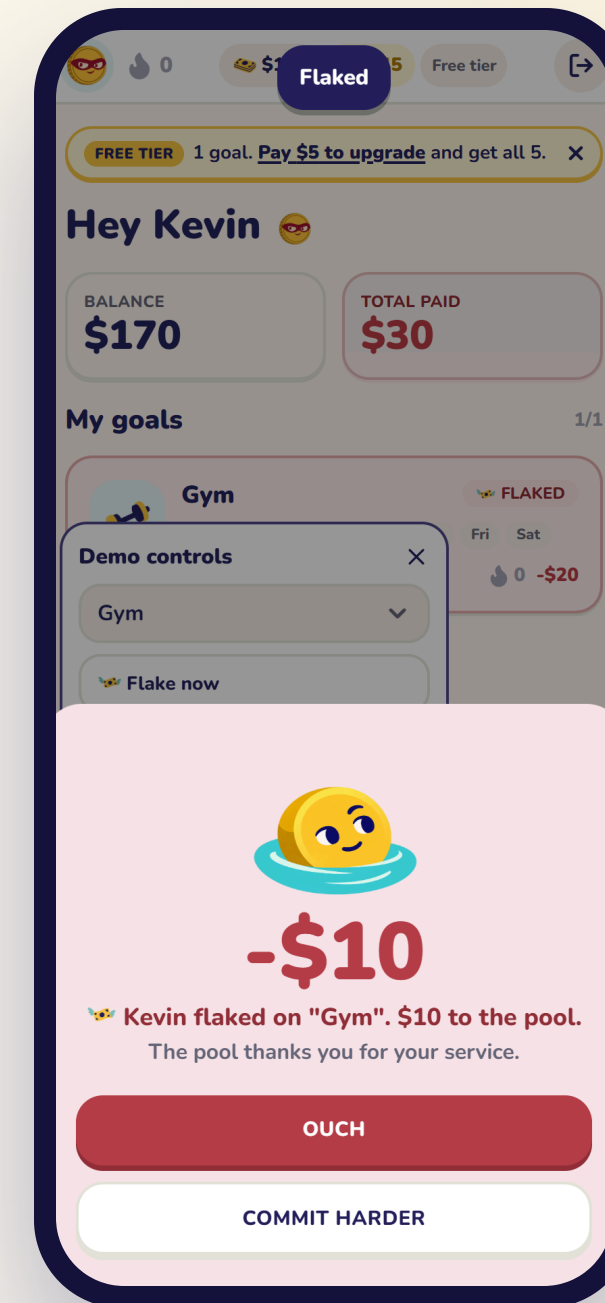

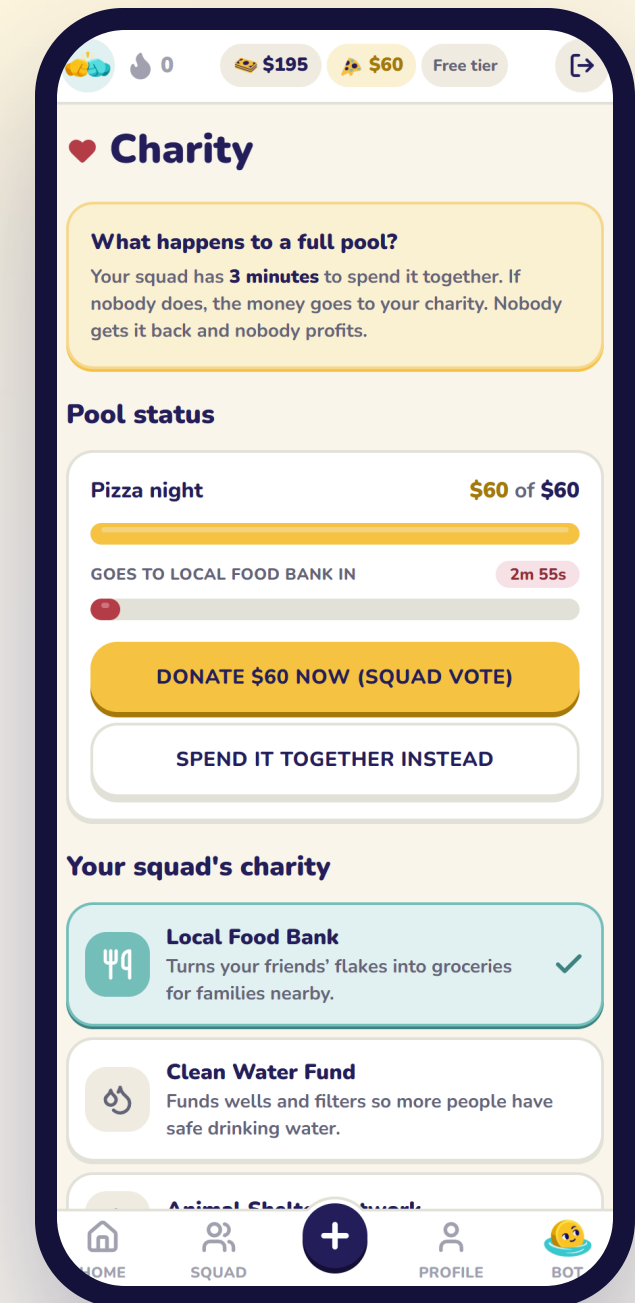

Photo verified by Grok vision

A couch gets roasted

Flake, and it costs you

Charged, shared, visible

Unspent pool goes to charity

A clock keeps squads honest

MONEY, REIMAGINED

Fair by design, not gambling.

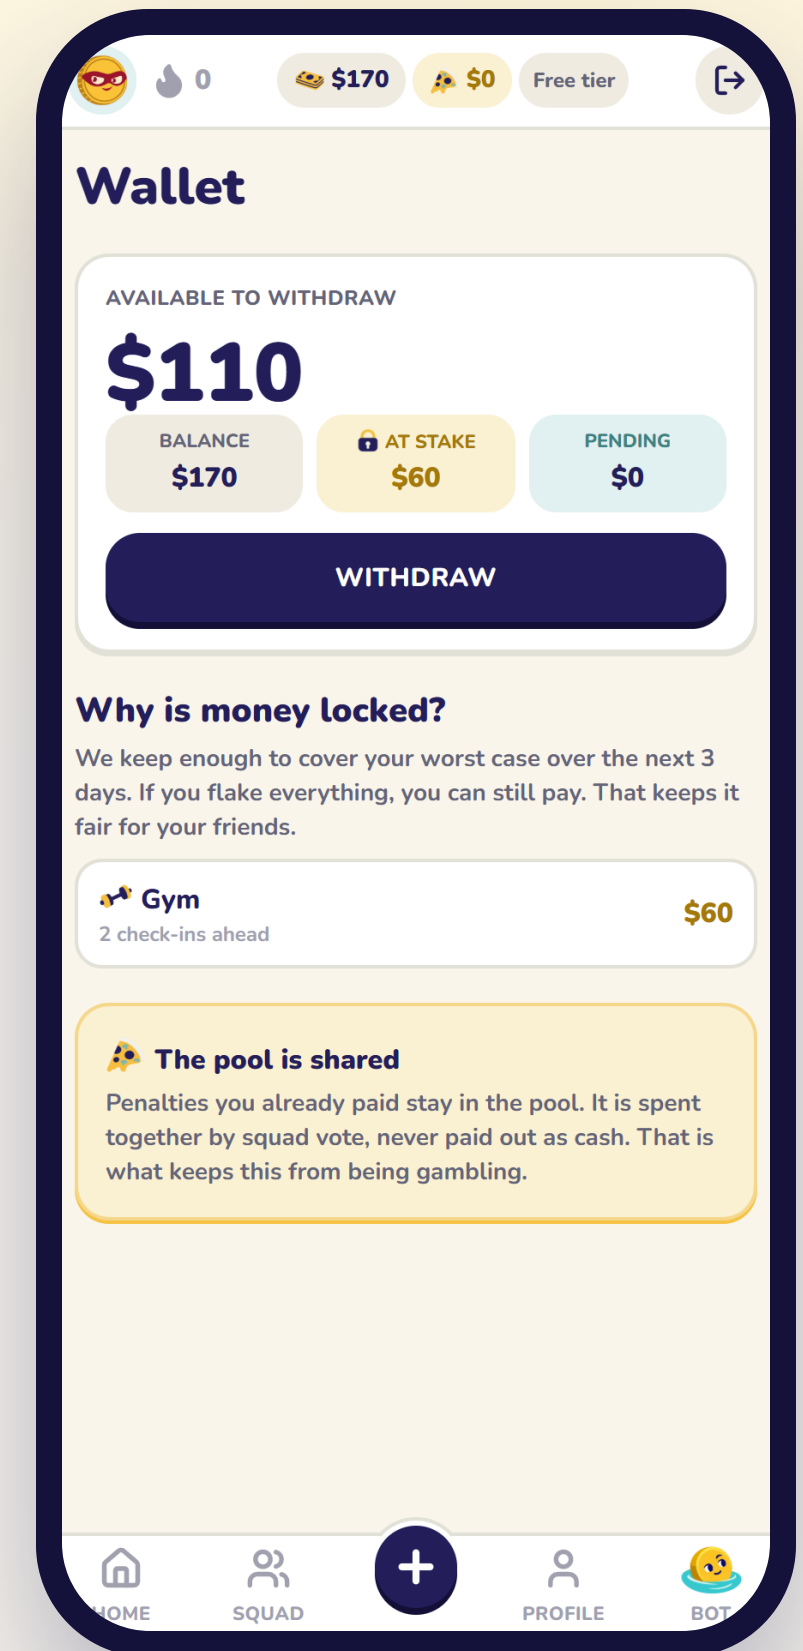

✓ The pool is never paid out as cash and never refunded to the flaker.

✓ A locked stake covers your next 3 days, so nobody can flake and run.

✓ Withdrawals have a cooling period and can be cancelled.

✓ Penalties double per flake but are capped, and a balance never goes negative.

✓ A full pool nobody spends in 7 days goes to charity.

ACTUALLY INTELLIGENT

AI that does real work, not AI for AI's sake.

Squad Bot (Grok)

Answers with your real data. Proposes penalty changes that the engine validates and you confirm.

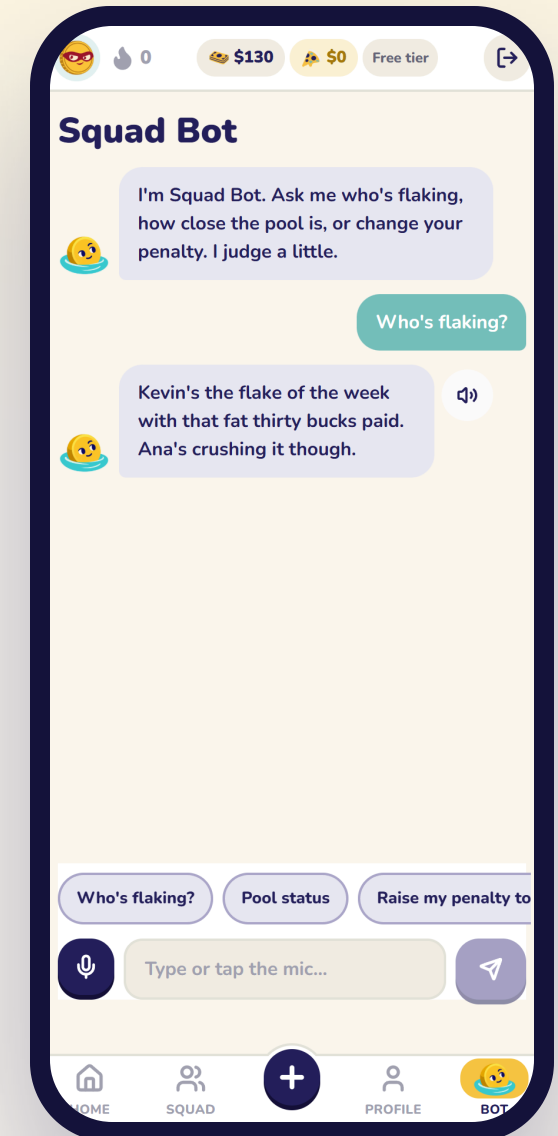

Vision check (Grok)

Looks at the photo. Rejects a couch and writes the roast. Fails safe if the AI is down.

Goal coach (Grok)

Turns one sentence into days, deadline, minimum stay and a realistic penalty.

ElevenLabs: talk to Benny the Penny, voice and sound effects

Photon Spectrum: the same bot on iMessage

BUILT TO BE TRUSTED

One contract, many services.

273 automated tests on the money rules, idempotent penalties and edge cases.

Independent code audit by a second AI model; every demo-breaking finding fixed.

Stage-proof: a full mock backend runs the same contract if the wifi dies.

Keys stay server-side; paid routes accept only our own app.

Spacetime

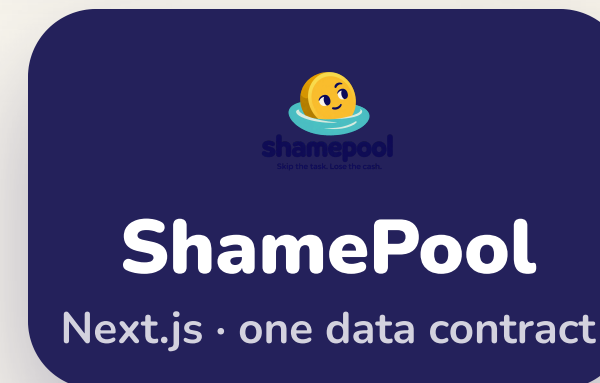

Live state, rules, real-time sync

Photon Spectrum

The bot on iMessage

ElevenLabs

Voice in and out, sound effects

Grok (xAI)

Bot, vision and goal coach

Capital One Nessie

Every penalty as a transfer record

Deployed on Vercel

BUSINESS MODEL

We earn when pools are spent, never when you fail.

Merchant cash-outs

Gift cards and partner offers every time a squad spends its pool.

ShamePool Plus

More goals, bigger squads, deeper stats and the AI coach.

Teams and campuses

Gyms, schools and companies run challenges for their members.

Hackathon friends

Campus squads

Gyms and teams

TRY IT NOW

Skip the task. Lose the cash.

FinTech: commitment contracts, shared money, real Nessie transfers.

Actually Intelligent: vision, tool use and a coach doing real jobs.

Spacetime, ElevenLabs, Photon: each one load-bearing, not decoration.

Polish: a full design system, mascot, voice and a projector mode.
